📍 127 Maligaya Street, North Fairview / Fairview 1118 Quezon City Philippines

Summary

Senior **Fullstack Shopify Developer** with 8+ years of experience building scalable **Shopify Plus ecosystems**, custom applications, and high-performance eCommerce platforms. I specialize in **Shopify App Development (Node.js + React)**, advanced **theme architecture (Liquid, JSON templates)**, and deep **API integrations (GraphQL & REST)**. I've worked on turning Shopify stores into full operational systems by connecting them with backend services, automation workflows, and external platforms while maintaining strong performance across **Core Web Vitals** and user experience.

Experience

Senior Shopify Fullstack Engineer, *Freshflow*

10/2023 – 08/2025

Berlin, Germany

- Architected and built **custom Shopify Apps** using **Node.js** and **React**, powering complex business workflows including product customization and order automation
- Led development of advanced **Shopify themes** using **Liquid**, **Sections**, and **JSON templates**, creating dynamic and immersive storefront experiences
- Designed and implemented integrations using **Shopify APIs (GraphQL & REST)**, connecting Shopify with ERP systems, logistics platforms, and third-party services
- Structured complex product data models using **Metafields** and **Metaobjects**, enabling scalable and flexible product configurations
- Developed backend logic using **Shopify Functions** and automated workflows with **Shopify Flow**, streamlining operations between sales and fulfillment
- Optimized storefront performance using tools like **Google Lighthouse**, improving **Core Web Vitals** and conversion rates
- Contributed to **CI/CD pipelines** and deployment workflows, ensuring stable and consistent releases
- Collaborated closely with product, design, and operations teams to translate complex requirements into scalable solutions and mentored junior developers

Fullstack Shopify Developer, *CustomerX*

02/2019 – 08/2023

Toledo, Brazil

- Developed and maintained **Shopify Plus stores**, building custom themes and extending functionality using **JavaScript (ES6+)**, **HTML5**, and **CSS3/Sass**
- Built API-driven integrations with **GraphQL** and **REST APIs**, enabling real-time data exchange with external services
- Implemented interactive frontend components using **React**, improving user engagement and flexibility of storefront features
- Worked on **performance optimization**, reducing load times and improving overall user experience across devices
- Participated in architectural discussions, helping define scalable approaches for growing eCommerce platforms

Web Developer, *Iceblink Solution*

12/2017 – 09/2018

Manila, Philippines

- Built and customized **Shopify themes** using **Liquid** and modern frontend technologies
- Implemented responsive UI components and enhanced user interactions using **JavaScript**
- Supported integration of third-party services and assisted in API-based data handling
- Collaborated with designers to translate brand concepts into functional storefronts

Education

Bachelor in Computer Science, *University of Santo Tomas*

09/2013 – 07/2017

programming, algorithm development, computer architecture, operating systems, and networks

Manila, Philippines

Diploma in Information Technology, *New Era University*

08/2012 – 05/2013

programming, cyber security, cloud computing and business analysis

Quezon, Philippines

Skills

Shopify

- Shopify Plus
- Custom Apps
- Liquid
- Sections
- Blocks
- JSON Templates
- Metafields
- Metaobjects
- Shopify Functions
- Shopify Flow

Backend & APIs

- Node.js
- GraphQL
- REST APIs
- OAuth
- Webhooks

DevOps

- Git
- CI/CD
- Performance Optimization
- Core Web Vitals
- Google Lighthouse

Frontend

- React
- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- Sass

Architecture

- Headless Commerce (Next.js, Hydrogen)
- System Design
- Scalable Architecture

Core Strengths

- Platform Ownership
- Automation
- System Integration
- Mentorship
- End-to-End Delivery
